### Reports

- Django site has been created and put onto the Github, no tasks have been complete yet from the sprint however.
- Database has been set up on everyone's laptops.
- We are prepared and ready to begin the sprint.
- During workshop we set up our Django and mySQL to work on everyone's machine with the correct privileges.

### Unfinished business

- All necessary business completed.

## **New business**

Tasks to be complete by our Monday Meeting

1. Justin - Justification for selecting a specific architecture pattern for Smart City project
  2. Gabor - Logical and Physical diagrams of the chosen architecture pattern for Smart City project
  3. Component Diagram for Smart City project
  4. Data Flow Diagram for Smart City project
- 3 and 4 - Matt, Kurtis, Steve

Begin work on the sprint 1. Delegate the tasks out to the four developers.

### **Matthew Swan:**

Story 1 - As a user I am presented with the login/sign-up page so that I may login or create an account.

Story 2 - As the user I want to be able to create an account on the website so that I can login and use the website.

Story 3 - As a registered user I can login with my credentials so that the website is catered to me.

### **Kurtis Mason:**

Add input on Matt's Story 3.

Story 4 - As a user, I want to have my password salted so that it is difficult to be cracked.

### **Steve Nguyen:**

Story 5 - As a student/tourist/businessman, I want to be able to browse information about the city, so that I can see relevant information.

Story 6 - As a businessman/tourist, I want to be able to browse hotels so that I can see relevant information about these hotels.

### **Justin Manche:**

Story 7 - As a businessman I want to be able to view information about industries.

Story 8 - As a student I want to be able to browse colleges and libraries so that I can see relevant information on colleges and libraries.
